The Honorable Lucille Roybal-Allard
Ranking Member, House Appropriations Committee
Subcommittee on Homeland Security
2038 Rayburn House Office Building
Washington, DC 20515

Dear Chairman Carter and Ranking Member Roybal-Allard,

On behalf of the nation's fire and emergency services, we write to urge your continued support for programs that enhance our nation's readiness and emergency response capabilities: the Assistance to Firefighters (AFG) and the Staffing for Adequate Fire and Emergency Response (SAFER) grant programs, the U.S. Fire Administration (USFA) and the Urban Search and Rescue Response System (US&R).

The AFG and SAFER grant programs are imperative to addressing the needs of more than one million fire and emergency services personnel, while providing an economic stimulus to American businesses. As you begin work on the Fiscal Year (FY) 2019 appropriations process, we encourage you to fund these programs at \$810 million evenly divided between the two programs. This funding level represents a restoration to the Fiscal Year 2011 funding levels and will assist local fire departments in meeting the increasing costs of equipment, training and personnel.

Congress created AFG and SAFER to address the baseline needs of our nation's fire and emergency services. These two highly successful programs help ensure that our nation's 30,000 fire departments have the necessary training, equipment, and staffing to respond to over 33 million emergency calls annually and to continue to reduce community risk. Every community relies on firefighters to respond to a variety of emergency situations, including structure fires, emergency medical services, hazardous materials response, technical rescues, and wildland/urban interface fires. Both the AFG and SAFER grant programs improve the response capabilities in each of these emergency response areas, and provide funding for crucial fire prevention and safety programs targeted toward high-risk populations.

Unfortunately, the past five years have seen a steep increase in the cost of some of the most common and sought-after firefighting equipment, much of which is critical to lower the alarming rate of cancer in the fire service. An analysis by industry experts estimates that from 2011 to the present, the cost of protective clothing has increased by an estimated 11.4%. During the same period, the cost of self-contained breathing apparatus (SCBA) increased by an estimated 15%. These cost increases were due in part to the increased costs of raw materials and to necessary changes to equipment standards that improved firefighter safety. Additionally, there has also been a sharp increase in the cost of firefighting apparatus. The cost of pumper trucks, which make up approximately 60% of the apparatus market, has increased by an estimated 14.6% due in large part to price increases for materials and labor.

The AFG and SAFER grant programs provide the means to enhance preparedness and response capabilities nationwide to all types of hazards, as well as support fire prevention and education programs. These capabilities are squarely in the federal interest and justify continued federal investments.

Another issue we bring to your attention is funding for the U.S. Fire Administration (USFA). USFA plays an important role at the national level, ensuring that the fire service is prepared to respond to all hazards. Each year, USFA provides training to approximately 100,000 fire and emergency service personnel through the National Fire Academy (NFA). It also collects important data and conducts research to reduce the threat of fire and other dangers in local communities. Unfortunately, over the past decade, USFA's budget has been reduced by approximately 25% percent. A lack of sufficient funding jeopardizes the agency's ability to aid state fire training systems, reduces technical support for the data collection, and threatens the support of the National Fallen Firefighters Memorial Weekend. We ask Congress to fund USFA at \$50 million to assist the agency in carrying out its vital mission.

Lastly, we request your support for the Urban Search and Rescue Response System (US&R). As the nation's only self-sufficient, all-hazards, ready-response force, US&R is essential to our nation's homeland security. Given its crucial importance, we are extremely concerned with the program's consistent underfunding. The average cost to maintain a US&R team exceeds \$2 million. Although Congress has funded US&R at \$35.18 million for the past several years, this amount only covers a portion of the necessary costs, leaving local governments responsible for filling the gap and, thus, impairing local public safety. We urge Congress to increase funding for the program to \$50 million in Fiscal Year 2019.

We remain grateful for your continued leadership in ensuring that America's fire and emergency services are prepared to protect the public from all hazards – both natural and manmade. As you continue developing legislation to fund these programs for Fiscal Year 2019, we urge you to consider our recommendations to ensure that our nation's first responders can continue to protect and serve their communities safely and effectively.

Sincerely,

Congressional Fire Services Institute
